-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 22 June 2001.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.

**EXAMINER'S RESPONSE**

1. In response to the application filed 6-22-01, the application has been examined. The examiner has considered the presentation of claims in view of the disclosure and the present state of the prior art. And it is the examiner's opinion that the claims are unpatentable for the reasons set forth in this Office action:

***Claim Rejections - 35 USC § 102 & 103***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 1-5 and 7-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Hildebrand (US 5640153).

Hildebrand discloses an HVAC control/curtailment module with paging module 28 receiving instructions from energy provider or utility and communicating the instructions to a processor 30 which stores the instructions in memory and interfaces to energy utilization devices 9. The memory also stores instructions to provide a verification including monitoring data such as logging and meter readings and program data confirmation in col. 9. The verification includes an ID header in fig. 10 representing device ID. The logging represents history. The keyboard logging indicates that the device includes user input. Since the program data is stored from the pager message, the program data confirmation represents the curtailment message. See cols. 4-6 and 9-10.

6. Claims ~~6~~<sup>6</sup>-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hildebrand (US 5640153) in combination with Brown (US 5544036) and/or Moughanni (US 5608655).

Brown discloses an analogous art pager controlled HVAC control system user input keyboard and display in cols. 10-13 to indicate memory setting. See cols. 2-14. Moughanni discloses an analogous art pager controlled HVAC system with the message processing unit displaying the pager message in claims 12 and 25.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to have included in Hildebrand the displaying of the verification code in view of the Brown disclosing displaying the memory setting in order for the user or service personnel to confirm settings and instructions. If display of the message is not clear, then such would have been obvious in view of Moughanni to confirm message

receipt by the processor. If it is not clear that the ID header in Hildebrand is a device ID then such would have been obvious because the remote utility or management company controls a plurality of devices and a device ID would be required to identify which of the plural devices is reporting.

**CONTACT INFORMATION**

Any inquiry of a general nature or relating to the status of this application should be directed to the Technology center 2600 receptionist whose telephone number is **(703) 305-4700**.

Facsimile submissions may be sent via fax number (703) 872-9314 to customer service for entry by technical support staff. Questions regarding fax submissions should be directed to customer service voice line (703) 306-0377.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Edwin C. Holloway, III whose telephone number is (703) 305-4818.
